

Course: Reducing X-ray Anxiety: A Logical Approach to Film Interpretation

Course Description:

At the end of this module, the doctor should:

- feel more comfortable with accepted conventional terminology used in describing radiographic findings
- have a greater understanding of a logical, sequential approach to radiographic analysis
- have an increased ability to apply the CATBITES categories of osteopathology when deriving a differential diagnosis
- have an increased aptitude for composing

Course Format: Power Point with Audio

Cost: \$75.00

Credits: 1.0

Instructor: Dr. Marshall Deltoff

Bio:

Dr. Marshall Deltoff is a 1983 honours graduate of the Canadian Memorial Chiropractic College in Toronto. Subsequently, he completed his radiology residency at Los Angeles College of Chiropractic in 1986, the first Canadian DC to travel to the United States for a full-time residency. Dr. Deltoff is a specialist in diagnostic imaging with over 25 years of academic and clinical experience. He has taught all aspects of undergraduate radiology at CMCC, where he also chaired the radiology residency programme. Dr. Deltoff initiated the radiology curriculum at the Université du Québec à Trois-Rivières, Canada's first and only university-based chiropractic programme.
